## Vote Education Approach to CBAX Modelling

14/07/2017

The Ministry of Education's Budget 2017 CBAX models use cost/benefit analysis to assess the impact of proposed Budget initiatives. The CBAX models use estimated inputs and outputs to complete the cost benefit analysis.

The costs and benefits used in the models are based on estimated monetised impacts that are informed by various assumptions:

- The Personal Income, Income Tax, Welfare and Justice costs at different qualifications levels are estimated from Ministry analysis of the Integrated Data Infrastructure (IDI) database. The Health costs at different qualification levels are estimated from Ministry analysis. These impacts are used to show the estimated effect of changes in qualification levels.
- The remaining impacts are estimated from Ministry data around programme, salary and operational costs. These impacts are used to estimate the flow-on effects from proposed initiatives to other education programmes, and salary and operational expenditure.
